

You can now request signatures right from Claude.

The first Brazilian electronic signature platform in Claude's official directory. Just connect RIA Sign, by searching for RIA, and ask in the conversation.

Signing over WhatsApp

ICP-Brasil seal on every document

October 7, 2026

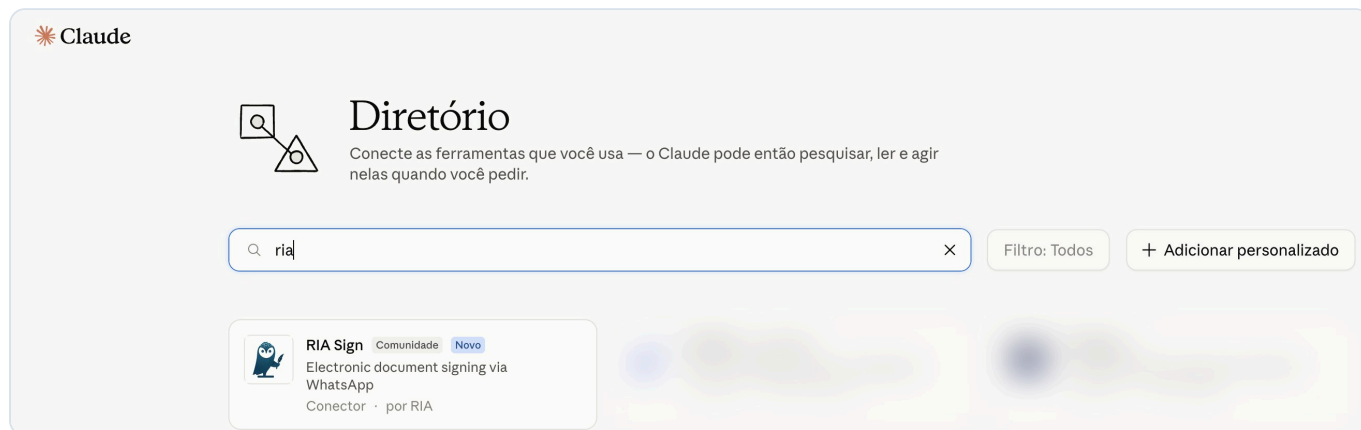

OCTOBER 2026

For lawyers and any business that closes contracts over WhatsApp

sign.riasistemas.com.br

Lawyers and any business can now request document signatures right from Claude. Just connect RIA Sign (MCP), published in Claude's official connectors directory, by searching for RIA. Published on October 7, 2026, as a community connector, RIA Sign is the first Brazilian electronic signature platform in Claude's official connectors directory. The listing is at claude.ai/directory/connectors/ria-sign.

RIA Sign in Claude's official connectors directory, when searching for "ria" (October 7, 2026)

You already use Claude to draft the contract. Now it also sends it out for signature.

SECTION 1

What you can ask Claude to do

- **"Send this contract to Maria Silva to sign on WhatsApp."** Works with a finished PDF, up to 10 documents in a single envelope, with a signing order when there is more than one signer.
- **"Draft a services agreement between my firm and João, R\$ 5,000 a month, 12 months, and send it for both of us to sign."** Claude writes it, you review it, and RIA Sign sends it.
- **Saved templates**, with fields each signer fills in at signing time.
- **"Which documents are still waiting for a signature? Send a reminder to whoever hasn't signed."**
- Download the signed PDF, cancel an envelope and check your plan usage.

Nothing goes out without your OK

Before anything is sent, Claude shows the document and every signer, with name and phone number, and waits for your confirmation. If something is wrong, you fix it right there, before it reaches the client.

SECTION 2

How signers receive it

The signer doesn't need an account or an app. They receive the document on WhatsApp and sign in WhatsApp itself or on a page opened on their phone. When you ask for it, the signature includes a selfie and a photo of the signer's ID document.

Signature requests are sent from RIA Sign's official number. If you prefer, you can connect your law firm's or company's WhatsApp Business number to your account in the RIA Sign dashboard and start sending from your own number.

SECTION 3

Legal validity and ICP-Brasil

The signature is electronic, simple or advanced, under Brazilian Law No. 14,063/2020 and Provisional Measure No. 2,200-2/2001. Every completed document comes with a certificate page, an audit trail, a timestamp (RFC 3161) and a public link anyone can use to check its authenticity.

Also through Claude: anyone who already has their own certificate from ICP-Brasil, Brazil's public key infrastructure (a cloud e-CPF), signs at the qualified level in the same flow, at no extra charge.

On top of that, the completed document receives **RIA's ICP-Brasil Integrity Seal**: a signature made with the company's ICP-Brasil certificate, which makes it possible to prove the file has not been altered since it was completed. That is why it can be checked in the Brazilian federal government's official validator, **validar.iti.gov.br**. The seal attests that the document has not been altered. The level of each signature (simple, advanced or qualified) is the one recorded in the certificate inside the document itself.

**ICP-Brasil Integrity Seal**

On every completed document. Check it at validar.iti.gov.br.

SECTION 4

How to connect

1. In Claude, open **Connectors** and search for **RIA** in the official directory. If you prefer, add it by its address, sign.riasistemas.com.br/mcp.
2. To sign in, enter your phone number: you receive a 6-digit code on WhatsApp.
3. If you don't have a RIA Sign account yet, it is created on that first sign-in, with no credit card.

SECTION 5

Frequently asked questions

Do signers need Claude or a RIA Sign account?

No. Only the sender needs an account. The signer receives the request on WhatsApp and signs without registering or installing anything.

Can Claude send a document on its own?

No. Before every send, it shows the document and the signers and waits for your confirmation.

Is the signature legally valid?

Yes. It is an electronic signature, simple or advanced, as provided for in Brazilian Law No. 14,063/2020 and Provisional Measure No. 2,200-2/2001, with a certificate, an audit trail, a timestamp and a public verification link on every completed document. Anyone with their own ICP-Brasil certificate (cloud e-CPF) signs at the qualified level in the same flow, at no extra charge.

Can the document be checked at validar.iti.gov.br?

Yes. Every completed document receives RIA's ICP-Brasil Integrity Seal, a signature made with the company's ICP-Brasil certificate, and can be checked in the Brazilian federal government's validator, validar.iti.gov.br. The seal attests that the document has not been altered. The level of each signature (simple, advanced or qualified) is the one recorded in the certificate inside the document itself.

Does the document come from my firm's number?

It can. Signature requests are sent from RIA Sign's official number; if you prefer, you can connect your law firm's or company's WhatsApp Business number to your account in the RIA Sign dashboard and start sending from your own number.

Start for free.

Connect RIA Sign in Claude and sign in with your WhatsApp. Your account is created on first access, with no credit card. Or create it at sign.riasistemas.com.br.
